

## Description of at-risk funding plans

Friendship uses its at-risk funding to support students' academic and social emotional development as well as provide enrichment and remediation opportunities in alignment with our mission. Funding support staffing and supplies needed to implement strategies and programs that will ensure the success of this targeted population.

- Counselors, Deans, Pathways Coordinators, and Student Support Teams are available to support the culture of our schools as well as the social emotional needs of our most vulnerable students.
- Friendship has implemented our World Class Education model by hiring music, art, and dance and world language teachers across all campuses. This investment provides cultural engagement opportunities in fine arts programming and enrichment activities that broadens their scope of the world around them.
- Summer learning experiences and remediation at no cost, allows for credit recovery and intervention to prevent summer learning loss and enrichment programs to prepare students for college and career.
