Charter School

Welcome Message

Greetings!

Welcome to the FPCS Collegiate Campus Earth Day Celebration “Green our Community/Restore the World.” Today, our Collegiate Academy Early College scholars will celebrate Earth Day through a variety of activities including a walking museum of our grounds, planting, neighborhood cleanup, Smoothies Sip and Paint, and arts and crafts.

The national theme for Earth Day 2021 is “Restore our Earth,” which is a global call for all of us to protect and restore our environment. While public policy plays a part in environmental sustainability, it is ultimately up to us as individuals to truly make the biggest difference.

Simple changes in our daily lives can go a long way toward protecting our Earth, such as walking more and driving less, picking up trash in our community, planting a tree, plant or flower, using both sides of a paper or going paperless, and using less electricity by turning off a light switch. Every effort helps if we all chip in.

Our clean and beautiful environment is one of our community’s most important resources. As stated in Friendship’s core values and mission statement, it is in our best interest to be responsible, productive citizens. Our commitment to protect, preserve and restore our Earth for generations to come is aligned with our school mission.

We extend a special thank you to our partner Ms. Rebecca Bankhead with the University of the District of Columbia CAUSES Partnership for supporting the **Collegiate Urban Garden Program**.

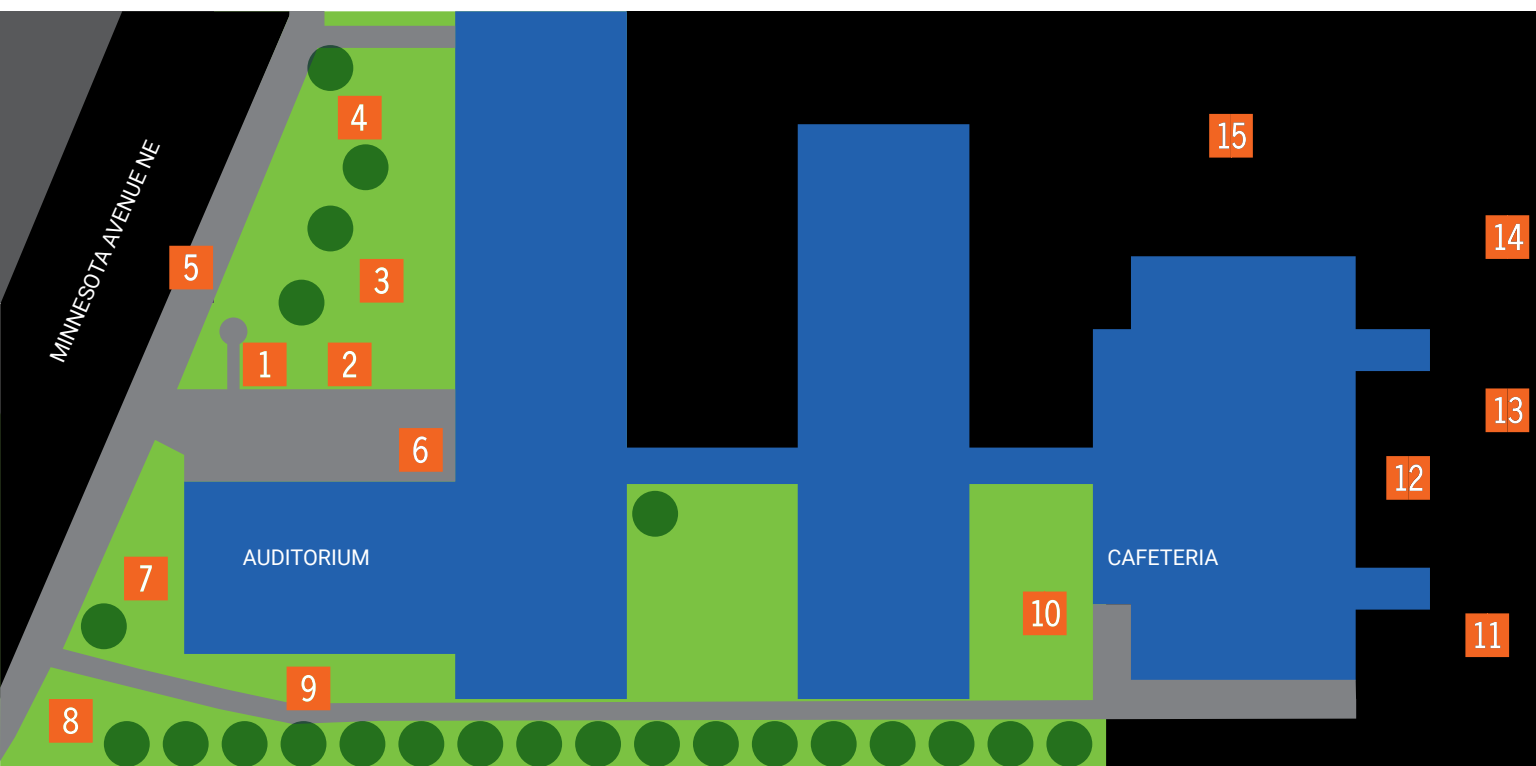

Our school is also grateful for the leadership of FPCS Advisor to the CEO Ms. Kimberly Campbell who has mentored our team through the creation of the school garden program and Earth Day celebration.

I encourage everyone to do their part, celebrate Earth Day and take a moment to rededicate yourself to preserving the beautiful surroundings we call home.

Sincerely,

Dr. Peggy Jones,
Principal

Earth Day Program

12:30-12:40 p.m.
